

RENTOLIC

Website/App Flow

Revision	Date	Description	Author
		Initial Version	

Introduction:

Rentolic Application's main motto is to serve as a quality online marketplace bridging the gap between a lender and the borrower. Here a lender can advertise his product and the borrower can rent the product from the lender at the defined price of the Lender. Rentolic application is a bridge between lender and borrower, we shall have no payment gateways used to cater to the needs of the lender or borrower. The transaction of money shall happen outside the Rentolic website.

Website / Application Structure:

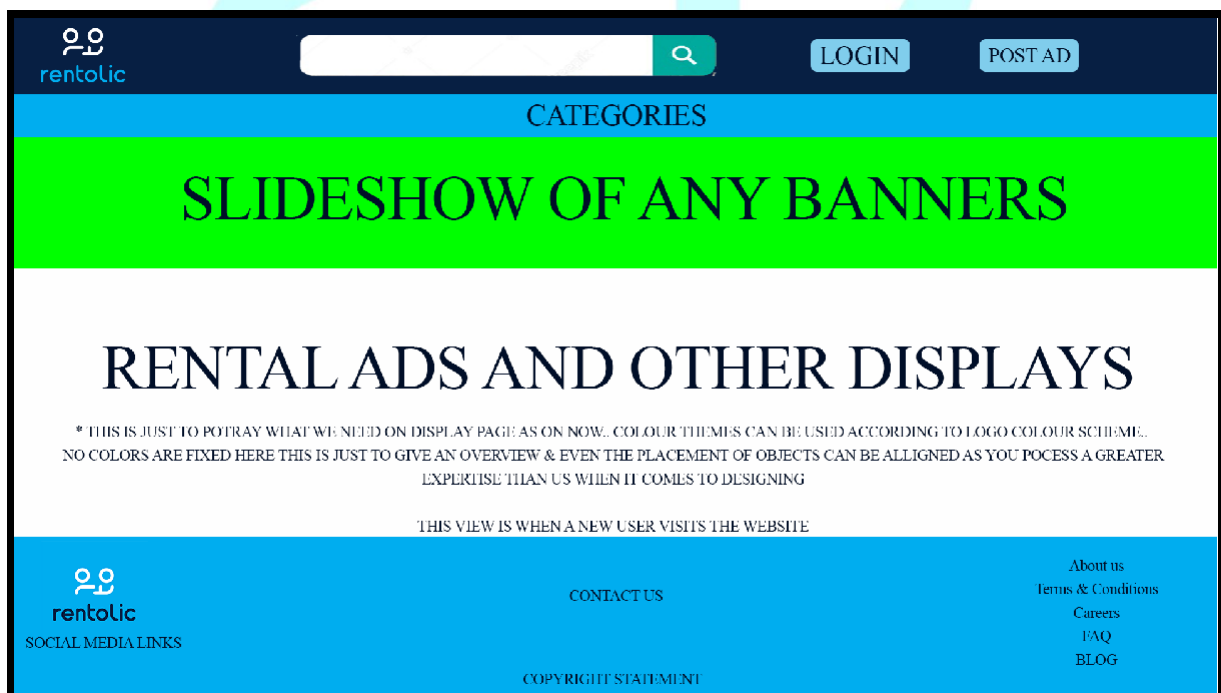

IMAGE 1: IF A USER VISITS A WEBSITE WITHOUT A LOGIN

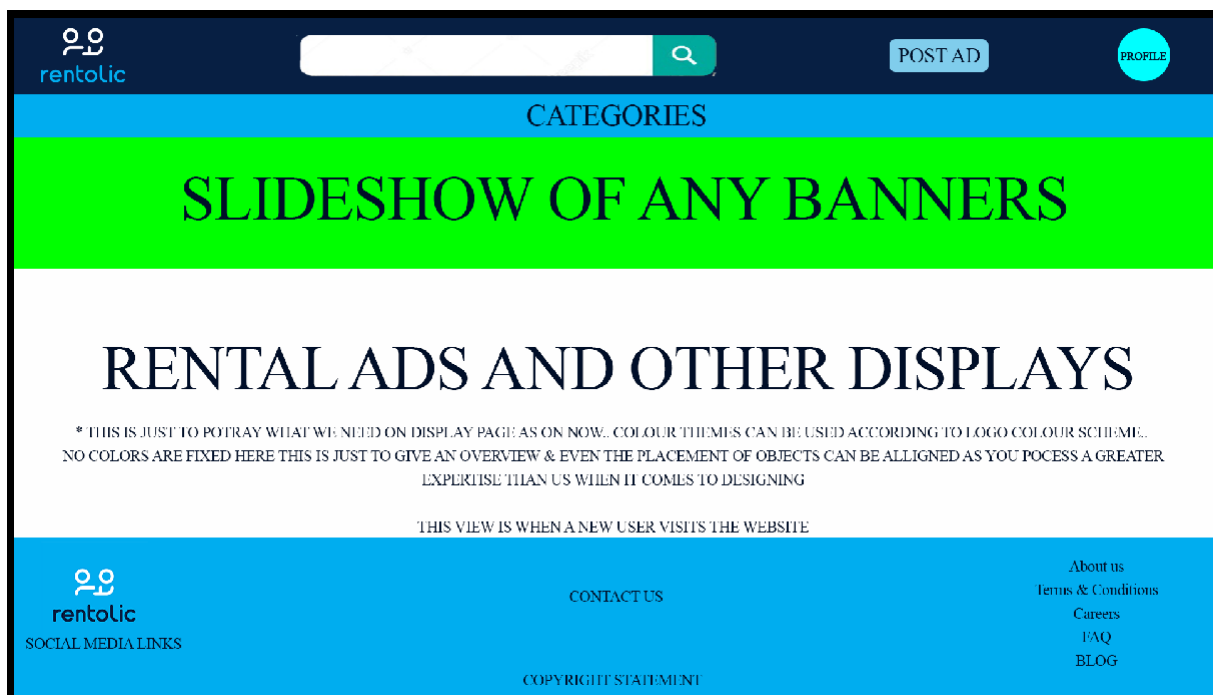

IMAGE 2: WHEN A USER VISITS THE WEBSITE AFTER LOGIN

Types of login:

- Admin - Rentolic
- Customer – Lender / Borrower

Admin:

Has all the permissions to regulate application.

Customer:

Has limited permission based on type and product i.e., Borrower / Lender

We will have only 1 type of login irrespective of Borrower/Lender, Once the user logs in he are automatically treated as a borrower. Only by clicking on the Post ad button, he can find details to post the ad. All the ads posted by the user must reflect under the profile of the user (My ads).

Requirement - Also every person who posts/ has a profile in rentolic should have an easy profile search, this will help lenders to share profiles and also feel privileged. this can also be based on a unique user name and also provide a customer id.

Customer ID - Can be 6 digit code (A00001, AA0001, AAA001 ETC)

Ad ID - Can be 9 digit code (“customer ID”001, “Customer ID”999 Etc)

Search Tab - Should search by product name and also should search by client ID

Normal application viewers:

Without login:

- View default home page (Image 1 displayed under Website/application structure)
- View all ads in his city (i.e., Bangalore)
- Must not be able to view info of the lender until login is done. (Login Popup should occur)

After login:

- View default home page (Image 2 displayed under Website/application structure)
- View all ads in his city (i.e., Bangalore)
- Cant view the info of the lender until login is done.
- The profile should be seen
- API calling (WhatsApp and call feature) to be enabled so customer can directly call or text lender through the app)

Under user profile

Login Info Required

- Name
- Contact number
- Mail Id
- Password

Or Login using social media handle (Google / Facebook)

To view under User Login (after logging into the website)

- User name
- Wishlist
- My ads (if opened and no ads posted. Add post an Ad option so the user can post Ad)
Inside My ads, the user should be able to delete, make offline or modify Ad data.
Ad reviews and No. of views of Ads should also be tagged onto each ad.
- Edit Profile
- Also, provide the option to share profile and products to customers via Chatting apps (eg whatsapp)
